CITY OF COLLEGE STATION

College Station Utilities
Reliable, Affordable, Community Owned

College Station Utilities
Reliable, Affordable, Community Owned

IT'S EASY ... CHOOSE RENEWABLE ENERGY

CLEAN & SIMPLE

The highest quality of life for its citizens has long been College Station's community vision and is one of the main reasons that we all choose to live and work here. The City of College Station is committed to the preservation of this quality of life for generations to come. There is now a very easy way for you to help the environment and maintain that quality of life by participating in the development of electricity from a pure and non-polluting source—wind.

WHY WIND?

Frankly speaking, choosing Wind Watts is about each of us choosing to improve our community. It's why more than 60% of our residents choose to recycle through our curbside program. It's why College Station chooses to have open space and greenways that improve the quality of life. Wind Watts is another step we are taking to enhance the quality of life our community demands.

CHOOSING RENEWABLE ENERGY

College Station Utilities has purchased 10% of the power generated from the South Trent Mesa Wind Farm in Abilene to offer Wind Watts, a program that provides a source of pollution-free power to our community. Customers who choose to participate in the Wind Watts Program may choose from 3 levels. They are 100%, 50%, or 10% of your energy from wind.

WIND WATTS ADDED COSTS

Participation Level	100 %	50%	10%
Additional Kwh Cost	\$0.02	\$0.01	\$0.002

FOR COMMERCIAL CUSTOMERS

Choosing to use a renewable energy source like wind power offers a number of benefits to businesses and organizations, including:

- Environmental Stewardship
- Public Image
- Customer Loyalty
- Employee Pride

Another benefit would be to publicize that your service or product is produced with environmentally friendly energy.
