Collection & Disposal Information

TRASH LIMITS

All regular refuse, garbage and yard trimmings can be placed in the containers. Public Works encourages the bagging of your refuse prior to placement in your container to assist in keeping your container clean and sanitary, as well as to help prevent litter on windy days.

Items that CANNOT be placed in your container include:

- Dirt, sod, brush, concrete or rock
- Large appliances or furniture
- Hot ashes or flammable materials such as oil, gas or paint
- Debris from construction, remodeling or demolition
- Hazardous waste, liquids or any [materials prohibited at the landfill](#).

TRASH PREPARATION

At the edge of the curb (not into the street) by 5 AM on the scheduled day(s) for your collection service. Place the container at least 4 feet away from mailboxes, additional containers, and other obstructions. Don't put the cart behind parked cars or under low tree limbs and wires. Don't stack additional items in front of, on top or beside the container, as they will interfere with collection.

BULK ITEMS / CONSTRUCTION & DEMOLITION DEBRIS

Call or [email](#) Public Works at 764-3690 to request a roll-off container or a special collection service at an additional fee.

SERVICE DAYS

Please call Public Works at 764-3690 or email us, PubWorks@cstx.gov.

EXCESS GARBAGE

Consistently - Please call Public Works at 764-3690 in order to increase your service days or get a larger container.

Occasionally - Please request extra service by calling Public Works at 764-3690. We'll be glad to return for a nominal fee. If you continue to have excess garbage on a regular basis please call Public Works at 764-3690 to order an additional container or increase service days.

PROBLEMS

Missed - First, check to see if the waste collector left a yellow service problem tag on the container or front door. The tag will notify you of any problems we had trying to service the container. Make any requested changes (moving the can, clearing items in front of it, etc.) that are on the tag and call Public Works at 764-3690. We'll be glad to return and service your container.

Spillage / Litter - Several things can cause spillage and litter when your can is being serviced. First, make sure that the container is not overflowing and that the lids are completely closed. Also please bag all garbage placed in the can. This cuts down on litter flying out of the can on windy days and keeps the container clean and odor free.

DAMAGED CONTAINER

Call Public Works at 764-3690 or click [here](#). We'll replace or repair your container at no charge by the end of the next business day. Please be sure to leave the can in a location that is accessible to our personnel.

COST

Commercial solid waste collection rates are applied based on both the method and frequency of services provided. The more waste a business generates, the higher the fee will be. Click [here](#) to see the sanitation rate schedule.
